Scientific publishing is essential for your academic endeavor but can sometimes be a mysterious process. This workshop will provide an overview of the publication process and discuss what constitutes authorship. Join us to learn and discuss:

- how to select a target journal
- how to write a cover letter and respond to peer reviewers
- how to handle the intellectual property and ethics issues
- the norms and trends in determining who get to be listed as authors and in what order
- new collaborative authoring tools and new approaches to disseminate your research output
